

Streamline Family Engagement Reporting and Tracking with FamiliesLink

The Family Engagement Platform for Public Schools

Federal programs like Title IA and Title III have specific family engagement requirements. Gathering, tracking, and managing family engagement data for these programs can be challenging, adding to your administrative burden. FamiliesLink simplifies this process by offering a comprehensive data dashboard that helps you track and monitor these requirements, measure the success of your programs, and enhance family empowerment.

Streamline Family Engagement Reporting and Tracking with FamiliesLink

FamiliesLink is a family engagement platform with language access at its core. It enables direct engagement with families through surveys and integrates with LinguistLink and Student Information Systems (SIS) such as Skyward. This makes it easy to find everything you need to track family engagements and demonstrate compliance with federal and state regulations.

With FamiliesLink's simple dashboard, you can:

- **Support families:** Identify families who may need extra support and follow up with emails, texts, and in-language phone calls.
- **Simplify compliance:** Effortlessly track and report all necessary data for Title IA and Title III compliance.
- **Solicit feedback:** Easily send, receive, and translate surveys to gather program feedback and understand family needs.
- **Consolidate data:** Connect with LinguistLink and SIS systems for integrated data aggregation and reporting.
- **Analyze data:** Export data into Excel for custom analysis and reporting.

What is LinguistLink?

If you're not already using LinguistLink, it's the easiest way to manage language access requests and projects. Our online portal makes it simple to:

- Schedule translation and interpretation jobs.
- Connect with professional linguists.
- Monitor project progress.
- Pay invoices—all within one intuitive workspace.

And it integrates with FamiliesLink so language access reporting happens effortlessly.

Our founder's take:

"We designed FamiliesLink to make it easier for schools to get the data they need for their family engagement and language access programs to effectively support multi-lingual and multi-cultural families. As a result, students can focus on learning, families stay connected and informed, and teachers have the tools to communicate effectively with everyone. With FamiliesLink, nobody slips through the cracks."
